Subject: Draft 14, Sept 15
Sensitivity: Confidential

Hi Barbara,

I attach the last (and hopefully final) version of the program charts with the actual WatchPC screen configurations.

To confirm my response to Kim's comments:

1. We can build an "alert" program that will warn the coordinator if the subject is amiss. We need criteria for the anomalies from you.
2. We can develop an online form for in the case the subject uses the paper diary time to time, for the coordinator to enter data from the paper diary. This data then will be automatically incorporated with the other WatchPC data. The form will be similar to the presently used EP90 form. KIM WILL PROVIDE US WITH A COPY OF EP90.
3. We can incorporate a NOTES/COMMENTS window with the subject compliance verification charts. The coordinator could enter their subsequent comments, and these will be available from these windows, anytime.

As these are new requirements, we need to get your confirmation as soon as possible so that we can provide an estimate and completion deadlines for these items.

I will be on meetings all day. I will respond to your messages tonight.

Have a good day.

Charles
